

Senator and State Rep visit Sand Lake

Pat Outman, Mollie Doerr, Rick Outman

I am happy to announce after having a meeting with Senator Rick Outman, & State Representative Pat Outman back in May, the Village of Sand Lake will be receiving funding for the E Lake St project. This was the very first project that was looked into by the Village council. After finding out the overall cost to resurfacing the roads and replacing storm drains, it was just not feasible any time soon. We then moved to a smaller road project our engineer suggested to do skip paving and chip sealing on 5 other roads that were in fair condition. The Village council was estatic when finding out this smaller project we got funding for and will be able to do in 2023.

Progress in Sand Lake

It's great to see the Village of Sand Lake is making progress and that all projects are being funded! Progress and development in a community can bring numerous benefits and improvements to the quality of life for its residents. Well-funded projects can enhance infrastructure, promote economic growth, and provide better services and amenities.

With the funding in place, the Village of Sand Lake can embark on various projects to address different needs and aspirations.

PROJECTS FUNDED

E Lake St Project

Paving and Storm drains.

Road Project

Beech, Maple, 5th, 6th, & 7th Street. Skip paving and chip sealing.
